

GREENFIRE
BUILDERS OF THE FUTURE

Project Development Manager Summary

Greenfire Management Services, LLC (GMS), was recently named one of the Southeastern Wisconsin's fastest growing firms. We are a Construction Management firm located in Wausau, Wisconsin. Founded in 2010, **Greenfire** is a wholly-owned company of the Potawatomi Business Development Corporation, the investment arm of the Forest County Potawatomi Community, and as such, maintains minority contractor status. We offer our employees a competitive benefit package, 401(k).

Greenfire Management Services, LLC is currently recruiting for a Project Development Manager for their office in Wausau, WI. The Project Development Manager is an integral part of the team, and responsible management of projects from project pursuit, through preconstruction, and into transition of projects to construction. The Project Development Manager for Greenfire reports to and is fully accountable to the Director of Preconstruction.

Duties & Responsibilities:

- Is responsible for project documentation during the preconstruction phase to provide clear direction to the project team and to reduce risk for Greenfire and the project team.
- Is responsible to work with the Director of Preconstruction to standardize procedures and documentation for the preconstruction phase of projects.
- Is responsible for the transition of project information and knowledge from the preconstruction to project management.
- Takeoffs must be complete, consistent, and accurate and understand where takeoff can be utilized for multiple systems.
- Understand all estimate components and be able to develop and input estimate component unit costs into estimating spreadsheets as well as understand components of and build construction system assemblies and develop and build assembly unit costs.
- Obtain subcontractor input for all estimates, provide comparison of subcontractor input to estimate, identify and assemble G.C.'s and project requirements related for estimates
- Understand critical cost/unit values, analyze and compare subcontractor budgets to GMS estimates. Be able to identify differences and adjust estimated costs or subcontractor budgets accordingly.
- Hard Bid Estimate Assembly includes being able to identify and act on all pre-bid project specific requirements, identify trades requiring bid solicitation. Assemble bid-day spreadsheet and manage bid day process and log historical date into database.
- Must understand construction sequencing and identify critical path items. Assemble project schedules and provide regular scheduled updates and direction to project team.
- Identify key players in subcontractor market and develop relationships with subcontractors and follow up with subcontractors to successfully obtain required bids and manage MEPFP coordination process.
- Participate in preconstruction meetings with clients, manage preconstruction process and understand project details sufficiently to be able to present all pertinent information to clients and obtain signed contract at or prior to Design Development level design documents.
- Organize and manage project kick off meetings.
